climate awareness and conversation

Order a climate cocktail

CARBON DROP - CO2 is great in a drink, like a French 75, but increasingly overdone in the atmosphere and ocean. **Botanist gin**, maraschino cordial, lemon, house calendula syrup, white wine, orange bitters, carbonated and bottled, served in 187ml bottles.

THE VELIGER - A spirit forward Martini cousin, designed to show how baby oysters are the ocean's *canaries in the coal mine*. **Haku vodka**, fino sherry, blanc vermouth, apricot cordial, touch of kummel, grapefruit bitters, served chilled and up with a spritz of peated scotch.

THIRSTY RANCHER - A scaffa style sipper that hints at the drying up of the old West. **Westland American Whiskey**, punt e mes, aquavit, huckleberry cordial, served scaffa style (room temp, no dilution).

ARCTIC PEAT - A Vieux Carre riff, spirited and delicate gives us view of the methane rising from the tundra. **Westland Sherry Cask whiskey**, **St. Remy brandy**, blanc vermouth, apricot cordial, kiss of absinthe and bitters, smoked with peachy arctic tar (peat, peach tree leaf, bear berry, molasses).

LA LIMA FINAL - Styled on the Margarita and created with faux lime, La Lima Final tells the story of North America's last lime. **El Tesoro Blanco tequila**, **Cointreau**, **Scrappy's Hellfire bitters**, **St. Remy brandy**, tamarind powder, malic and citric acidic, lime oil (faux lime), carbonated on draft, served over ice.

CANE AND ROIL - Based on the classic Corn & Oil, a drink that reminds us that water and oil don't mix. **Mt. Gay Black Barrel rum**, spiced pecan syrup, lime and grapefruit, shaken and served over crushed ice.
